VENKTESWARA HATCHERIES

Bhogapuram, Vizianagaram.

In this vacation I visited **VENKATESWARA HATCHERIES** located at **Bhogapuram in Vizianagaram District**. The head quarters of this hatchery is located in **Pune**. Nearly 40 people are working here **including supervisors, electricians, workers, sexors, delivery boys, etc.**

PICS: Interaction with supervisor and workers

Here eggs are hatched by using incubators. The Responsibility of Supervisor is to correct temperature of incubators and checking them for every hour.

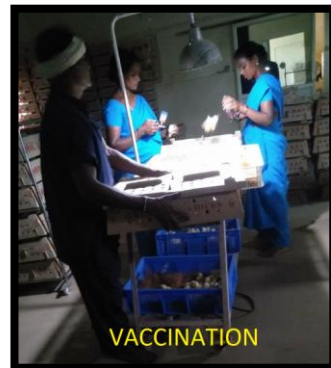

PICS: Readings of Hatchery machine, Readings of Setter machine, development chart of chicken embryo and check sheet

Electrician makes all machines and incubators to work properly at any moment.

PICS: Various machines available inside the Industry

Once the eggs were hatched they were vaccine by workers. Male and female chicks were separated by sexors. Finally female chicks were transported to poultry forms.

PICS: Vaccination and Sexing of Chicks

I am really amazed at their coordination and hard working nature. All employees have zeal to work.
